

Hacktober 20 fest 21

What? Why? How?

DigitalOcean

appwrite

intel

deepsource

What is hacktoberfest?

Less beer than the name implies

Submit 4 pull requests

In October

To public participating* repos

Get a T-shirt and stickers

Or plant a tree

Why?

Free stuff

Projects are
ready for
newcomers

Improve your
skills

Fun!

Make your
software
better

Contribute
to
open source

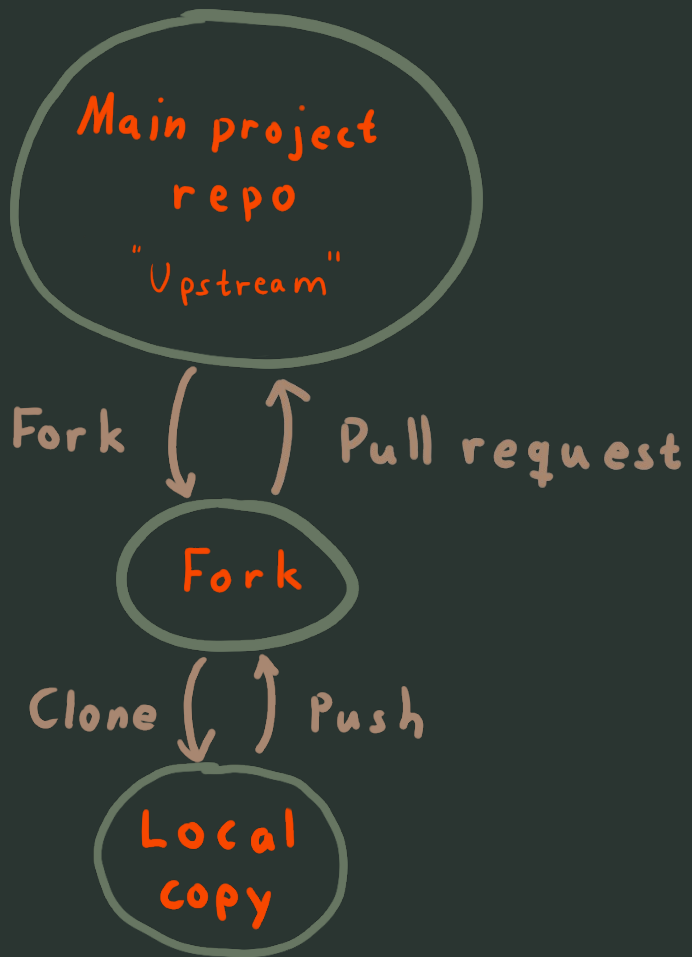

Get involved
in a
project

Practice reading
code

What is a Pull Request?

"Hey, can you pull my changes"

How to participate?

Sign up

Find a project*

(Find or open an issue)

Code (or write documentation etc.)

Make the PR

Get it accepted

Finding a project

Useful project

Eligible

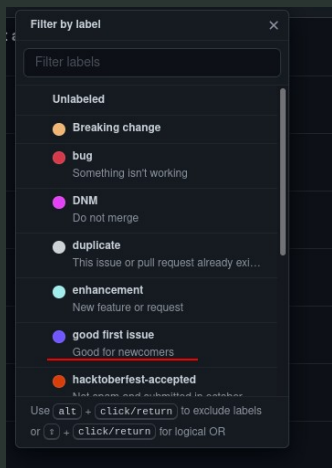

Something interesting

Language

Issue lists

Good scope

Cool tech

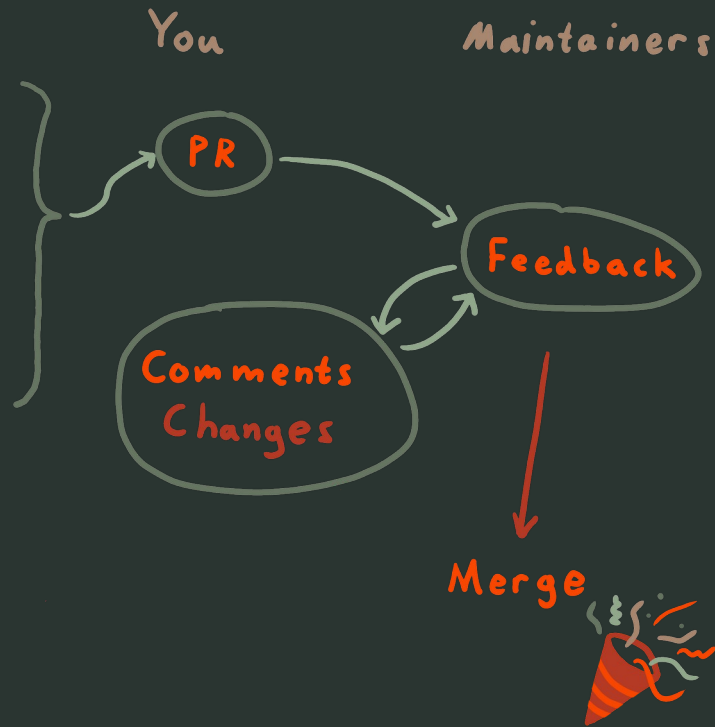

Submitting your PR

The code

A description

- What changed?
- Why
- Outstanding issues
- ...

Rules

PRs must be accepted in October
Approved or **Merged** in participating repo
or labeled “**hacktoberfest-accepted**”

Participating repos have the **Hacktoberfest** tag

PRs must be meaningful. No spam etc.

Tips

A way to get into OSS

Aim for 1 or 2 “big” PRs

Have fun

PRs to own repos count

Workshop

C++ på svenska

<https://github.com/TheZoq2/sweplusplus>

Spade (Filter by good-first-issue)

<https://gitlab.com/TheZoq2/spade>

Sylt (Filter by good-first-issue)

<https://github.com/FredTheDino/sylt-lang>

Anything else

<https://github.com/topics/hacktoberfest>

Thanks for
listening!
